

BRILLIANTLY SIMPLE

BEAUTIFULLY DESIGNED

BOLDLY DIFFERENT

**orbitjack**™

ROLL FREELY™

Hitching your trailer is a matter of precise movement in the direction and over the distance you need, not where the wheel wants to go.

The process of getting hitched kicks off your day of fun. It should be easy. And now it is. With omnidirectional steering from orbitjack.

OrbitJack crafts a beautiful spherical-wheel trailer jack that quite simply rolls freely....so you can, too.

ROLL FREELY™

360° omnidirectional steering - no more kicking the caster

1,200 lb. (544kg) capacity to work with your Class IV rig

Silky smooth, rock solid rotation - ditch the wobble

10" (25cm) lift from a light crank anyone can turn

Bolt-on, weld-on or bolt-around mounting to your trailer

Front-facing pull-handle, right where you would expect it

**MODEL T1**

TRAILER JACK

THOUGHTFUL DESIGN

Solid ball, stainless bearings & spring suspension deliver precise omnidirectional roll

3-axis bushings provide unheard-of smooth rotation & rock-solid stability

Easily maintained wipers brush dirt from the ball while rolling

Intuitive tab keeps the crank in place for trailering
